Gripping possibilities for the world of pipe and cable fastening

CLIC is more than just a plastic clamp: CLIC offers a high-quality system of solutions allowing you to grip many opportunities.

A product of Egli, Fischer & Co. Ltd., Zurich, www.clc-original.com

CLIC – the original

Since 1975 the self-locking pipe clamp CLIC has proved itself millions of times. Cables and pipes fixed with «Swiss Quality» are fast and securely fixed throughout the world.

Today, system solutions (pipe clamps, screws, plugs and accessories) are required, for instance in telecommunications. Consulting during the phase of planning, becomes more and more important. A long experience in business and our internal development division have allowed many individual solutions in collaboration with our customers engineers. Our production is able to preassemble tailor-made CLIC systems even at short notice.

The proven solution for cable conduits

Easy handling and fast mounting predestinates CLIC for fixing cable conduits.

The smart solution for specific tasks

For installations with higher demands, public areas or infrastructural buildings, the qualities of CLIC and CLIC TOP are especially recommended because of the high mechanical capacity, the excellent impact resistance and temperature stability.

The best solution for highest demands

CLIC TOP ideally covers the increasing demands for fixing points in sensitive environments. In many tunnels coaxial cables for radio and mobile telephone systems are openly mounted. The performance may not be impaired by interference from metallic parts. The plastic pipe clamp CLIC TOP is therefore the best solution for the installation.

Application areas

- Electrical installations
- Sanitary installations
- Control technique
- Chemical industry, difficult environments
- Clean rooms
- Radiating cables
- Fire alarm systems
- Swimming pools
- Central vacuum cleaners

clictop

Single-hand installation – a matter of course with CLIC: place the pipe, apply slight pressure and the clamp locks itself with a sharp *clic*.
Saves up to 40 % installation time in comparison to commonly used clamps.

CLIC 8 to 64 mm – Technology

The advantages of the original

Secure, fast, economical, user-friendly – a true fact. The outstanding features of CLIC are self-explanatory. Benefit from the advantages and the safety of the original that has proved itself since 1975.

CLIC 63 to 127 mm – Technology

Perfect for large pipes

For large diameters CLIC also offers the perfect solution with high-quality plastic materials. Count on the advantages and quality of the original that proves itself world-wide successfully, even under very hard conditions, for more than 25 years.

Plastic pipe clamps

For highest demands: the self locking pipe clamps CLIC TOP

Clamping range 8 to 127 mm (0.295" to 5")

CLIC TOP

- The solution in a demanding environment.

For indoor and outdoor applications

Applicable for dynamic loads

Material: high quality polyamide

UV-stabilized: 5 times better than PA6/PA66

Service temperature -40°C to +150 °C

Very low moisture absorption

High chemical resistance

Listed / approved by UL

Halogen free as per IEC-Standard 754-2

Easy to install

Simply mount CLIC, push pipe in by hand, grips and locks by applying slight pressure.

CLIC is a registered trade mark of Egli, Fischer & Co. Ltd

Technical data sheet

clic® top 8 - 127 mm

Application areas

Outdoor installation
Chemical industry in harsh environment
Electrical installations in tunnels (cable/conduits)
Sanitary installations of all kinds
Swimming pools
Switching cabinets

Features

Self-locking system without tools
Clamping range 8 - 127 mm (0.31" to 5")
Very high dynamic load
Very low moisture absorption
Chloride- and weather resistant
Very high stress corrosion crack stability
Approved by: KIWA® . UL®

Technical data clic® top 8 - 127 mm

Material quality	Polyamide PA 12
Density at +20 °C	1,01 g/cm ³

Chemical resistance

In general, polyamide 12 is resistant to many organic solvents and alkalis. Grilamid is also unaffected by petroleum fractions, oils and fats.

Concentrated acids cause relatively rapid hydrolytic degradation of all polyamides but PA 12 is resistant to dilute mineral acid and most organic acids.

The hydrolysis and environmental stress-cracking resistance of Grilamid are the most significant advantages of Grilamid in comparison to other engineering plastics.

PA 12 has a distinctly higher hydrolysis resistance than PA6 and PA66. The matrix is less hydrophilic, absorbs less water, even at elevated temperatures and, therefore, is less affected by hydrolysis.

The recommendations and data given are based on our experience to date.
No liability can be assumed in connection with their usage and processing.

How to find the right clic®

The most important criteria for selection, such as type and diameter of the pipe or cable as well as existing certifications, are listed together in table form, allowing you to find quickly the right CLIC

CLIC

- The economical system for a vast variety of inhouse applications

One-piece, self locking pipe clamp

Simple mounting without locking screws

All types of inhouse installation

Fast installation

Clamping range 8-64 mm (0.31" to 2.52")

Listed by UL,

approved by KIWA® and UL®

Halogen free as per IEC-Norm 754-2

Burning behaviour as per UL94 HB

Technical data sheet

clic® 8 - 64 mm / 63 - 127 mm

Application areas

Installation in the **internal area**
Chemical industry
Electrical installations (cable/conduits)
Sanitary installations (cold and hot water pipes)
Swimming pools: technical cabinets / racks
Switching cabinets / Electrical racks

Features

Self-locking system without tools
Clamping range 8 - 127 mm (0.31" to 5")
Mounting with bolts or wood screws
Very little moisture absorption
Approved by KIWA® and UL®
Switching cabinets / Electrical racks

Technical data clic® 8 - 64 mm

Material quality	High quality copolymer
Density at +20 °C	1,21 g/cm ³
Elongation at yield	5 %
E-Modulus in tension	2100 MPa
Water absorption at 23 °C	0,50 %
Moisture absorption (23 °C / 50 % R.H.)	0,15 %
Shore hardness D	82
Dielectric strength	33 kV/mm
Weather proof	-25 °C up to +90 °C
Mounting temperature	down to -10 °C
Maximum service temperature short term	+120 °C
Maximum service temperature long term	+75 to +90 °C
Flammability	HB according to UL 94
Fire class	B2 according to DIN 4102
Halogen	halogen free as per IEC 754-2
Petrol, diesel, oil	resistant
Corrosion	resistant
Weather-proof	no decomposition with correct use
UV	UV-stabilized as per ISO 4892-2
Standard colours	light grey (RAL 7035)
Special colours	on request

Technical data clic® 63 - 127 mm

Material quality	High quality PP homopolymere
Density at +20 °C	0,91 g/cm ³
Tensile strain at yield	9 %
Tensile modulus	1500 MPa
Hardness, Rockwell	98 R-scale
Service temperature	-10 °C to +80 °C
Melting temperature	+230 °C
Flammability	HB according to UL 94
Halogen	halogen free as per IEC 754-2
Corrosion	resistant
UV	not stabilized
Standard colour	light grey (RAL 7035)
Special colour	on request
