

55HX® ALUMINUM FOR ARCHITECTURAL SOLUTIONS

Anodising aluminium quality in coil or sheet format, especially developed for exterior or interior applications:

- façades and claddings
- walls and ceilings
- roofs

A perfect surface quality with color uniformity after anodising.

KEY BENEFITS

- Anodizing free of streaks
- Color uniformity between product batches
- Excellent flatness
- Very good deformation and bending properties
- After anodizing, weather, corrosion and UV-resistant
- Scratch-resistant
- European Fire Class A1: non-combustible
